## ABOUT ME

---

Frontend-focused Product Engineer with 4+ years of experience building high-performance web applications in fintech and startup environments.

Strong expertise in **Next.js (App Router & Server Components), React 19, TypeScript, Prisma, Zod, and monorepo architectures.**

Experienced in performance optimization, onboarding flow improvements, and conversion-driven product development. Combines technical execution with product thinking to ship scalable, user-centered features.

## WORK EXPERIENCE

---

**Banana Software**, Product Engineer (Buenos Aires, Remote) **12/2021 – Present**

- Frontend & full-stack development across fintech and real-time platforms.
- Developed and maintained production applications using **Next.js App Router and Server Components.**
- Built type-safe flows using **TypeScript + Prisma + Zod.**
- Improved web performance (Lighthouse & SEO metrics) by **~20%** through optimization of rendering strategy, component structure, and resource loading.
- Increased sprint predictability from **60% to 90%** by structuring technical estimations and capacity modeling.
- Removed **~20%** of low-impact features and reallocated effort toward high-conversion flows.
- Collaborated directly with designers in Figma to refine UX and improve user journeys.
- Participated in architectural decisions aligned with scalability and product goals.
- Contributed to fintech platforms involving payment-enabled flows and real-time systems.

**TUMO (Techstars '24)**, Frontend/Product-focused Engineer (NY, Remote) **08/2023 – 03/2024**

- Contributed to the 0→1 development of a fintech product simplifying tax management for freelancers in Argentina.
- Developed core frontend features using **Next.js and TypeScript.**
- Contributed to onboarding flow redesign, increasing user engagement by **~40%**.
- Supported early validation reaching **~100 active users.**
- Worked in accelerator-driven environment focused on rapid iteration and product-market fit.
- Collaborated closely with founders on prioritization and execution trade-offs.

**Dräger**, Business & Operations Planner (Buenos Aires) **09/2021 – 12/2021**

- Managed nationwide service planning using KPI tracking and ERP systems.
- Built operational reports supporting resource allocation and contractual compliance.
- Improved visibility into service capacity and execution alignment.

## SKILLS

---

**Frontend:** React 19 | Next.js 16 (App Router, Server Components) | TypeScript | TailwindCSS | shadCN | Responsive UI Development | Performance Optimization

**Backend & Type Safety:** Node.js | Express | Prisma (Production) | Zod (Schema validation) | REST APIs | MongoDB | SQL

**Architecture:** Monorepo architecture (Production) | Clean Architecture | TDD (Mocha, Chai)

**Tooling:** Git | Jira | Figma collaboration | Performance optimization (Lighthouse, SEO, Core Web Vitals)

## EDUCATION

---

**Buenos Aires Institute Technology**

**03/2015 – 06/2021**

Masters of Science in Bioengineering, GPA: 3.6/4.0

Awards: Academic Excellence Scholarship (merit-based).
